

Multilayer Chip Ferrite Bead – HPZ Series

Operating Temp. : -55℃~+125℃

FEATURES

- Internal silver printed layers and magnetic shielded structures to minimize crosstalk
- Perfect effect for EMI suppression at high frequency ($\geq 1\text{GHz}$)
- Low DC resistance suitable for large current signals
- Four types material and wide range of impedance values for various applications

APPLICATIONS

- High frequency noise suppression in electric equipments such as computers and peripheral devices, DVD, cameras, LCD TVs, communication equipments, OA equipments, etc.

TYPICAL ELECTRICAL CHARACTERISTICS

D, E, U Material Comparison

Rated Current

When operating temperatures exceed +85°C, derating of current is necessary for chip ferrite beads for which rated current is 800mA and over. Please apply the derating curve shown in chart according to the operating temperature.
